- Goals
- Statistics

II. Transportation Element

- Goals
- Policies

III. Questions

**MEETING SUMMARY**

**HOUSING**

The draft housing element was passed out to the group for review. Each member was given a red pencil to mark up the draft with changes or catch spelling errors.

A lot of questions came about after reviewing the draft about the population and housing data for the City. It was explained that the information came from the U.S Census Bureau and the Office of Financial Management and that they are not 100% accurate. T

It was decided that we would add an analysis of future multi-family housing needs to the housing element and we would revisit it at a later date.

**TRANSPORTATION**

With the housing element complete the Transportation element was the next focus. Transportation goals and policies were handed out to the group to review. Some minor changes were made and some policies added.
